Description:

A purrr-fectly scintillating new novel from the national bestselling author of Accidentally Demonic. Katie Woods never thought shed be forty-one, divorced, and thrust back into the dating world. To start fresh, Katie uproots her veterinary practice to upstate New York-not exactly the hottest dating scene on the planet. But when an unconscious cougar appears at her clinic, Katies newly single life gets a much needed jolt of the

supernatural kind. After Katie examines the cougar and leaves him caged overnight, she's shocked to find a big strapping specimen of young, hot man in its place. And when the scratch she got during the exam results in some unnatural side effects, Katie has more to deal with than her animal attraction to a much younger guy—she has to figure how to stop herself from becoming a cougar of the four-legged variety.

I am new to the Accidental Series and didn't want to pay the higher costs some of the books in the series. This one seemed interesting and if it didn't have the major flaw, I probably would have rated a four. The flaw stems from the too-much inclusion of characters from the other books. I don't feel the need to like every character in a book to still enjoy it, nor do I usually mind characters from related books popping in. However, these accidental women are awful. It is like the author is trying too hard to make the women trendy, quirky and interesting. Perhaps in a hey, you liked them in their own books, let's bring them all together for a super fun party while we solve this problem way. In small doses maybe it would have been okay. Or if I had read the earlier books - but I don't think so. It reminded me a bit of Catherine Coulter's FBI Thrillers series with Sherlock & whatshisname. The author fell in love with these characters & put them in every book of the series. The better books used them peripherally. They were so perfect I wanted to puke. The accidental women were not perfect, but they were so you-love-me-anyway imperfect I wanted to puke again. No more of this series for me.
